SUMMARY

Computer Science Engineering graduate specializing in AI and Machine Learning, with internship experience in data science, application development, testing, and AI-enabled workflows. Skilled in Python, SQL/MySQL, data analysis fundamentals, problem-solving, troubleshooting, and technical documentation. Interested in data quality, operational analytics, process improvement, governance, and automation. Strong willingness to learn business processes and support data-driven decision-making.

EDUCATION

Chandigarh University — Gharuan, Punjab
Bachelor of Engineering — Aug 2022 - Jun 2026
Major in Computer Science *Specializing in AI-ML in Collaboration with IBM*
Cumulative GPA: 8.17/10.0

Brahmrishi Mission Sr. Sec. School — Abohar, Punjab
Central Board of Secondary Education
Intermediate – Non-Medical (PCM) Percentage: 72% — Apr 2021 - May 2022
Matriculation Percentage:74.8% — Apr 2019 - May 2020

WORK EXPERIENCE

National e-Governance Division (NeGD), Technical Intern — Aug 2026 – Present

- Worked on AI-powered application development, including RAG-based chatbot implementation, document ingestion, retrieval workflows, and LLM-based response generation.
- Contributed to voice navigation integration, testing, debugging, and test-case analysis, identifying and troubleshooting the cases.
- Worked on UI/UX development using Figma and design systems, while exploring Generative AI, AI tools, models, and AWS Bedrock for AI application development.
- Worked on Data Validation using Soda Core, Great Expectations and DVC.

Celebal Technologies, Data Science Intern — May 2025 – Jul 2025

- Gained practical experience in Python, ML algorithms, and real-world data analysis through guided projects.

Bharat Intern, Web Developer — Oct 2023 –Nov 2023

- Designed and developed responsive websites using HTML, CSS, JavaScript.
- Implemented features like dashboards, login systems, data charts, and interactive user interfaces.

CERTIFICATION AND ACTIVITIES

OCI 2024 Generative AI Professional: Gained hands-on with Generative AI, LLM fundamentals, prompt engineering, and OCI.
Microsoft AI Odyssey & 30 Days Challenge: Strengthened AI concepts and applied learning through practical challenges.
Deloitte Data Analytics Job Simulation: Used Tableau for data visualization and business insights.
2nd Position, Mathematics Olympiad: Demonstrated strong analytical thinking and problem-solving skills.
Member, IEEE Delhi Section (2024): Enhanced technical collaboration, communication, and networking skills.
Postman API Fundamentals Workshop: gained hands-on experience in API testing, automation, and REST API concepts.

SKILLS

Data Analysis: Data Analysis, Data Validation, Data Quality, Data Integrity, Data Interpretation, Tableau, Power BI, Data visualization.
Business & Process Analysis: Process Mapping, Requirements Gathering, Process Documentation, Process Improvement
Testing & Controls: SDLC, STLC, Test Case Design, Testing, Troubleshooting, Risk Management
Automation & AI: Automation Fundamentals, Generative AI, AI-enabled Workflows
Programming Languages: Java, Python, C++, C
Technologies: HTML, CSS, JavaScript, Bootstrap, Spring Boot (In Progress), Rest API
Tools & Framework: Git, GitHub, MS PowerPoint, MS Excel, PowerShell and BigQuery
Core Concepts: OOPS, DBMS, DSA, Operating System, Computer Networks, Machine Learning, SQL and MYSQL
Interpersonal Skills: Decision Making, Communication, Teamwork, Multitasking, Problem Solving, Analytical Thinking.

UNIVERSITY PROJECTS

Synthetic vs Real: A Comparative Study on AI-Generated Art for Improved Learning in AI — Link

- Compared emotion detection models trained on real-world (FER2013) vs synthetic (SFHQ) datasets to assess performance.
- Evaluated models on accuracy, robustness, and generalization to measure the effectiveness of synthetic data for training.

AI-Powered Autonomous Vehicle Object Detection using OpenCV and Deep Learning — Link

- Built a real-time object detection system for autonomous vehicles using YOLO, Faster R-CNN, and OpenCV.
- Achieved high detection accuracy and efficient image processing for identifying pedestrians, vehicles, and road signs.

OpenCV-Enabled Gesture Control for Smart Devices | Python, OpenCV, MediaPipe — Link

- Developed a real-time hand gesture recognition system using OpenCV and MediaPipe for touch-free device control.
- Implemented gesture-based interaction and real-time video processing to improve human-computer interaction and accessibility.
